To Whom It May Concern:

This review of the Porta Pro product by Solterra Group LLC "Nev R Freeze" is made to inform the reader as to the safety aspects of the material.

Nev-R-Freeze is a blend of ingredients designed to lower the freezing point of both water and waste water. This product was designed as a safer freeze protection additive for both the "Blue Water" used in portable toilets as well as portable hand washing stations.

All ingredients in the product have been reviewed by scientific and regulatory bodies around the world (i.e. USA, European Union, Japan, Latin America, etc.) and are approved as safe for use in cosmetic and personal care products.

Our product is not flammable in the concentrate form.

The product is not regulated for transportation by road, sea, or air.

All ingredients are not toxic to skin according to multiple tests and many different applications.

Tests on humans and animals failed to show toxic dermal reactions. Multiple ingredients are used in facial make up are approved for use even near the eyes. Animal and human tests show mild irritation in some cases, but not all cases.

There is no known long term adverse effect on the skin from the use of any ingredient. Those ingredients have all been through extensive testing to show they are not mutagenic, are not shown by IARC and others to be carcinogenic, do not show any teratogenic or other reproductive or developmental issues when applied to skin.

A further element of safety is shown by the approval of all ingredients in at least one application noted as GRAS (Generally Regarded as Safe) by the US FDA. Examples: As a carrier for drugs given intravenously, as an additive in food packaging and as a direct or indirect food additive.

We trust the above information shows the reader that the Nev-R-Freeze product to be safer more effective alternative for liquid freeze protection as further described above.
